

PerMaT **costs** in **SaaS service** modality

Characteristics of the SaaS service cost

- ❖ **Payment** for renewable **annual** period
- ❖ Annual **cost according** to the following **parameters**:
 - No. of open projects:** A project is open when it is not finished or, having finished, the project does not have received the approval of the funder.
 - No. of active researchers:** Researchers assigned to an open project.
 - No. of closed projects:** Finished projects which are already approved by the funder.
 - Storage space:** Gigabytes contracted to document storage.

A Cloud service

that enhances the security and confidence of a professional management

Sustainable management

Pay per use
Minimal human resources

Maturity level 3

Costs shared by all clients

Costs

The annual cost is calculated using a mathematical formula with a weighted multidimensional graph. On the [website www.permatrp.com](http://www.permatrp.com) you can use a **simulator** of the function that calculates the cost according to your needs.

Examples

Open projects	Active researchers	Closed projects	Storage (GB)	Annual cost *
2	12	2	0	885.00
4	20	2	1	1,128.00
10	30	5	3	1,731.00
20	100	20	4	2,776.00
40	140	70	8	3,222.00
300	400	400	15	3,897.50

* Prices are in Euros (without VAT)
